## About

I have a deep interest in software development and enjoy creating web applications and websites. I strive to build products that benefit the community. With experience in analytics, I am eager to work with like-minded individuals to further develop my skills. Being part of a team where I can use my knowledge to achieve common goals and carry out meaningful projects is important to me.

## Education

2024

### master's degree

Университет науки и технологий  
МИСИС

Industrial Internet of Things and Predictive Analytics

2020

CodeAcademy

Web Developer

2019

### Bachelor

Baki Dövlət Universiteti  
Kompüter elmləri

## SKILLS

- C++
- C# (.net core)
- Python
- JavaScript
- TypeScript
- Angular
- HTML, CSS, SASS, LESS
- SQL

okt 2022 - jul 2024 KIBERONE | Moscow

### Teacher

In accordance with the company's program, I teach programming languages (Python, Java, etc.) and algorithms, 3D modeling, animation, game and website development, as well as robotics and artificial intelligence. I create and manage blogs, provide personalized support and mentorship to students, organize the teaching process using professional tools and methods, and give individual feedback to parents at the end of each lesson. I conduct interactive and engaging classes with small groups, aiming to develop students' IT skills and ensure high satisfaction from both parents and students by designing a comprehensive curriculum. I am passionate about developing children's digital skills and supporting them in building a successful career in technology by utilizing various tools and technologies (Scratch, Python, Java, HTML/CSS, Blender, Tynker, Kodu Game Lab, G Suite for Education, Microsoft Office).

may 2023 - jan 2024 ЭКСТРАПАК | Moskva

### Web Developer

I have been involved in enhancing the website, editing code on the CMS platform, programming in PHP, promoting the site through a Yandex advertising campaign, and SEO. I established a quality control system that minimized product defects by monitoring the quality of polyethylene bags. Additionally, I improved the website's functionality, increasing traffic and inquiries via the Yandex ad campaign. I utilized technologies such as PHP, HTML, CSS, JavaScript, CMS platforms (WordPress, Joomla, etc.), Yandex.Direct, and Google Analytics to make significant improvements in both web development and product quality.

aug 2021 - jun 2022 HƏDƏF "STEAM" LİSEYİ | Bakı

### Deputy director for training and education

I have been responsible for ensuring the implementation of behavior rules at school, maintaining discipline among both students and teachers, resolving conflicts with parents, and managing relationships. Additionally, I have been involved in planning and organizing various events. I taught C++, Python, and C# programming languages to students in grades 5-9, working to develop their programming skills and guiding them in creating relevant projects. I encouraged student participation and prepared them for coding competitions and Olympiads. As an expert on education and upbringing, I have also shared my experience by speaking at forums.

aug 2020 - jun 2021 HƏDƏF "STEAM" LİSEYİ | Bakı

### Teacher of Information Technology

I have taught introductory lessons on information technology and algorithms to students in grades 1-4, familiarizing them with programs like Scratch, Minecraft, CodeGame Lab, and Construct2. For students in grades 5-8, I have conducted lessons in programming languages such as C++, Python, and C#, developing relevant assignments and projects to enhance their programming skills. As a technology teacher, I have also taught Arduino programming and organized practical sessions on building and programming robots. As a class teacher, I maintained discipline in the classroom, monitored students' academic progress, arranged additional lessons, and worked closely with parents to address their concerns.

may 2017 - jun 2017 ТЭК ЛОГИСТ ГРУП | Moscow

### Web developer

I have developed a landing page for a logistics company, added the company to Yandex and Google Maps, and resolved issues on the website. Currently, a new version of the website is being developed.
